

Enthusiastic and creative product design student with a passion for solving user-centered design challenges. Seeking internships or opportunities to apply design thinking skills and gain real-world experience in a collaborative design environment.

Design Projects

May 2022

Product Redesign Project - DJI Drones Redesign

- Led a cross-functional team comprising designers, engineers, and marketers for a comprehensive redesign of a popular kitchen appliance.
- Conducted extensive user research through surveys, interviews, and usability testing to pinpoint user pain points and identify their specific needs.
- Leveraged user feedback to devise creative design solutions that enhanced both the appliance's functionality and aesthetics.
- Utilized SolidWorks to create highly detailed CAD models, allowing for precise visualization and design refinement.

August 2023

User-Centered Mobile App Design For Deaf People- Achilles

- Served as the sole UX/UI designer on a healthcare startup team, responsible for creating a mobile app.
- Conducted user interviews and thoroughly analyzed competitor apps to establish user personas and outline design objectives.
- Utilized Figma to craft wireframes and low-fidelity prototypes, emphasizing intuitive navigation and user-friendly interactions.

December 2024

Sustainable Product Design Of Shoes Challenge - Nike Recycle

- Led a sustainable product design initiative, prioritizing the use of eco-friendly materials and production methods.
- Conducted extensive research to identify and source sustainable materials, taking into account factors like recyclability, durability, and carbon footprint. Obtained Cradle to Cradle (C2C) certification, showcasing the commitment to sustainability and responsible product lifecycle management.
- Showcased the sustainable product design concept at a sustainability conference, earning recognition and accolades for its innovative and eco-conscious approach.
